DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee et al of record on 1449 .

Lee reference discloses a process for preparing polythiophenes in that ethylenedioxythiophene and a compound containing sulfonic acid group such as dodecylbenzene sulfonic acid are dissolved in solvent and oxidant solution (see Abstract, Introduction, experimental and Table 1).

Note that methanol and ferric toluenesulfonate can be used as a solvent and an oxidant, respectively (see Abstract and at Table 1).

The disclosure of the reference differs from the instant claims in that it does not disclose the claimed formulas (I)-(IV) nor the use of a phase transfer catalyst, as in the claims.

However, Lee reference does disclose a specific formula, a poly(3,4-ethylenedioxythiophenes), which is read on the claimed formula. Though reference does not disclose the use of any catalysts, the reference does disclose all the required reactants under the same or similar conditions to form the claimed products in that the catalysts are used to stimulate the reaction. Therefore, it would have been obvious to

one of ordinary skill in the art to select reactants under process conditions from the reference within the limitations of the instant claims without using catalysts since they have been shown to be effective in a similar system and thus would have been expected to provide adequate results. There is no showing of unexpected results derived from such selection (without catalysts).

Claims 2-3 are rejected under 35 U.S.C. 102(b) as being anticipated by DE 19841804 of record on 1449.

The DE 19841804 reference discloses polyalkylenedioxythiophenes (see page 3, Formulas (Ia, Ib, Ia-1, Ib-1), corresponding to the claimed formulas (I)-(IV) in the process for preparing polythiophenes.
